

Carrier Reports: Domicile

The Domicile report presents statistics for fatal, non-fatal, injury, and towaway crash events for large trucks and buses by their state domicile. MCMIS has a data element for the motor carrier's Principle Place of Business that is used to derive this report. If the truck or bus involved in the crash was operated by a motor carrier with the Principle Place of Business within the state, it is identified as a domiciled carrier. If the truck or bus involved in the crash was operated by a motor carrier with the Principle Place of Business identified other than the profile state, then it is identified as a non-domiciled carrier.
