

## Hazardous Materials Registration By Type

This report presents a registration breakdown of hazardous materials (HM) carriers and shippers for the last 5 calendar years. The values in the table reflect the counts as of the end of the year for the period selected. Selecting "Calendar" will provide counts based on the December snapshot for the selected year or period.

**Note:** Entities are considered HM if they meet one of the following criteria: 1) entity is registered as interstate and transports (carrying or shipping) hazardous materials based on their MCS150 form, OR 2) entity is registered as intrastate hazardous material, OR 3) entity is identified as a hazardous material carrier in the SMS system **and** has a recent hazardous material activity.

**Note:** Companies can register to transport HM materials in Bulk, Non-Bulk, or both, therefore the counts for 'with Bulk Storage' and 'with Non-Bulk Storage' may not equal the sum for a given category.
